Long Division- Multi digits by 1 digit

- 1 Solve the division problem.
 - 2 Find the quotient.
 - 3 Complete the division problem.
 - 4 Solve the division problem.
 - 5 Solve the following division problems.
 - 6 Complete the following mathematical expressions.
- + with many hints, answer keys, and solution approaches for all tasks

The complete package, including all tasks, hints, solutions, and solution approaches, is available to all subscribers of [sofatutor.com](https://www.sofatutor.com)

Solve the division problem.

Select the correct answer.

What is
 $484 \div 4$?

120

A

121

B

202

C

21

D

Our hints for the tasks

1
from 6

Solve the division problem.

1. Hint

$$\begin{array}{r} 1 \\ 4 \overline{)484} \\ \underline{-4} \\ 0 \end{array}$$

Step 1: Divide. How many times does 4 go into 4? 4 goes into 4 **1** time. Write the 1 above the 4 in the dividend.

Step 2: Multiply 4×1 , and place this number below the 4 in the dividend.

Step 3: Subtract.

2. Hint

$$\begin{array}{r} 12 \\ 4 \overline{)484} \\ \underline{-4} \\ 08 \\ \underline{-8} \\ 0 \end{array}$$

Step 4: Bring down the 8.

Step 5: Repeat the steps twice.

Solutions and solution approaches for the tasks

1
from 6

Solve the division problem.

Answer key: B

$$\begin{array}{r} 121 \\ 4 \overline{) 484} \\ \underline{-4} \\ 08 \\ \underline{-8} \\ 04 \\ \underline{-4} \\ 0 \end{array}$$

- Step 1: *Divide*. How many times does 4 go into 4? **1** time. Write this 1 above the 4.
- Step 2: *Multiply*. $4 \times 1 = 4$. Place this 4 under the 4 in the dividend.
- Step 3: *Subtract* the 4s.
- Step 4: *Bring down* the 8.
- Step 5: *Repeat* the steps twice.

The answer is **121**.
